Trans. of Glav[naya] Geo[fizicheskaya] Obs[ervatoriya] Leningrad. Trudy (USSR) 1957, v. 69 [131] p. 36-40

The convective power is more completely characteristic of convective motion than the energy of instability usually used by weather services in forecasting convection. A method is worked out for determining the power of convection from aerological observation (temperatures and winds), and the relationships investigated between the convective power (determined from data of morning sounding) and the maximum intensity of convection in day time.

DESCRIPTORS: *Vinyl chlorides, Copolymerization, Polymerization, *Acrylic acids, Acids, Esters, Benzoates, Polymers, Molecular weight.

The copolymerization of vinyl chloride with methyl-, n-butyl-, n-octyl methacrylates and vinyl benzoate was studied. The rates of the copolymerization of vinyl chloride with methacrylates and the molecular weights of the polymers in all of the corresponding monomers are less than with acrylates. These values
